

*New!*

# Ultrasound Speech Therapy

**Ultrasound speech therapy** is a new, noninvasive method that helps children and adults who still have trouble with certain speech sounds, most commonly “r” and “s”. This state-of-the-art speech therapy uses ultrasound to visualize tongue position and offers immediate feedback to the client. Consistent, intensive therapy may lead to faster remediation of the sound error.

**Age Group: 8 years old to adult • Session Length: 45 minutes**

**11635 Euclid Avenue, Cleveland, Ohio 44106**
